Jovanni Hernandez

GREETINGS,

Thank you for taking the time to review my resume. I am currently finishing my Bachelor of Science degree and will be pursuing graduate studies in the near future with a concentration in information assurance. I am interested in networking with prospective recruiters, employers, or employees and learning more about security related jobs, cooperative education, and internship opportunities.

A very brief bio:

I'm a funny and laid back person who strives to complete projects in a comprehensive, cost-effective, and efficient manner. I have been working with computers for over a decade; my first computer was a 500 MHZ powerhouse with 256 MB RAM, 3x slower than my current phone. In my spare time I enjoy tinkering with new hardware and devices, reading the latest security related news, and participating in forums such as the Information Security Community.

My academic and professional interests are in network security, cryptography, and anomaly detection. I am also interested in online privacy and its emerging facet of behavioral tracking.

I can be found on the following online networking avenues:

LinkedIn: <http://www.linkedin.com/in/jovannah>
Google+: <http://gplus.to/jovannah>

Sincerely,

Jovanni Hernandez
